

We have been providing expert advice on wood-burning stoves for more than 20 years 

IRONWOOD

“ Designed, developed & manufactured in South Wales ”

01 BUYING

When buying a wood-burning stove, it's important you consider the size and output, so that it will adequately heat your home.

Your local Ironwood dealer can assess the size of your home to match you with the right appliance.

02 INSTALLING

Installing a wood-burning stove should always be completed by a professional, to ensure it complies with UK building regulations.

Ironwood stove stockists will have a HETAS registered team of engineers, who can support you through the installation process.

03 MAINTAINING

Ironwood recommends that you have your chimney swept at least twice a year, before the start of the heating season and after the peak of the main heating season.

GET IN TOUCH

Contact us if you'd like to enquire about an Ironwood Stove and we can also help you find your local dealer.

WHAT MAKES IRONWOOD STOVES DIFFERENT?

Our steel comes directly from Port Talbot, with manufacture and assembly at our premise in Cowbridge. By keeping production as local as possible, it makes us the first wood-burning stove company to be **designed, developed & manufactured in South Wales.**

WHY CHOOSE AN IRONWOOD STOVE?

Alongside being locally produced, all Ironwood Stoves have the following benefits:

HIGHLY EFFICIENT

Through clean burn technology, our wood-burning stoves have been awarded an 80% efficiency rating, which means they produce very little smoke and particle emissions along with a high efficiency burn.

ENVIRONMENTALLY CONSCIOUS

Our stoves have been designed to comply with the Clean Air Act 1993. Releasing a minimal amount of harmful emissions, our stoves have been approved safe to use in smoke control areas.

EASY TO MAINTAIN

With superheated airwash technology, the glass window of our stoves stays cleaner for longer, making them incredibly easy to maintain.
